

Royal Commission
into Aged Care Quality and Safety

Statement of John Leong

Name: John Leong

Date of birth: [REDACTED]

Address: The Sisters of Our Lady of China Health Care Pty Ltd,
27 Jacques Ave, Peakhurst, NSW 2210

Occupation: Compliance and Development Manager

Date: 25 June 2019

1. This statement made by me accurately sets out the evidence that I am prepared to give to the Royal Commission into Aged Care Quality and Safety.
2. This statement is true and correct to the best of my knowledge and belief.
3. The evidence I give in this statement is based on my own knowledge education, training and experience, except where otherwise stated.
4. I make this statement on behalf of The Sisters of Our Lady of China Health Care Pty Ltd ACN 101 572 605 (**OLC**) and I am authorised to do so.
5. This statement is supplementary to my previous statement dated 14 June 2019 being WIT.0244.0001.0001 (**First Statement**) which was made in response to the Notice to Give Information or a Statement in Writing received from the Royal Commission on 12 June 2019 (Notice No. NTG-0244).

Pain Management Schedule

6. Schedule A to my First Statement was a schedule that I prepared setting out, among other things, the prescription and administration of analgesia for Mr Paranthoienne between 18 September 2017 and 3 October 2017 (**Pain Management Schedule**).
7. The Pain Management Schedule indicates that on 19 September 2017 Mr Paranthoienne:
 - 7.1. did not receive any Oxycontin in the morning, but received 20mg of Oxycontin at 8pm; and
 - 7.2. did not receive any Lyrica for the whole day.
8. In fact, the records indicate Mr Paranthoienne received a dosage of 20mg Oxycontin and 25mg of Lyrica in the morning of 19 September 2017. This is documented in:

Signature of person giving this statement: 

Signature of witness: *Wood*

- 8.1. Mr Paranthoienne's progress notes for 19 September 2017 at 0910hrs which state 'Morning meds given by RN as per discharge summary' (Tab 20 of the Tender Bundle SLC.0001.0002.3666); and
- 8.2. the Pain Management Chart for 19 September 2019 which indicates that 20mg of Oxycontin was administered at 8am as per discharge summary (Tab 26 of the Tender Bundle SLC.0001.0002.3414).
9. Upon that basis, I have prepared an amended and updated Pain Management Schedule which is Schedule A to this statement.
10. The updated Pain Management Schedule has also been amended in column 'HC Professional Review' for 25 September 2017 to note that a physiotherapist assessment was conducted on this day. This is documented in Mr Paranthoienne's Nursing Progress Notes (Tab 30 of the Tender Bundle SLC.0001.0002.3670).

Pain management interventions

11. At paragraph 98 of my First Statement I provide a summary of those occasions on which Mr Paranthoienne's pain was monitored and assessed.
12. The information in paragraphs 98.1 to 98.25 of my First Statement is drawn from Mr Paranthoienne's Nursing Progress Notes (Tabs 20, 25, 30, 33 and 40 of the Tender Bundle SLC.0001.0002.3666 to SLC.0001.0002.3674) and Mr Paranthoienne's Pain Management Charts (Tabs 18 and 26 of the Tender Bundle SLC.0001.0002.3414 and SLC.0001.0002.3416) for the period between 18 September 2017 and 3 October 2017.
13. In paragraphs 98.1 to 98.25 of my First Statement, when I refer to analgesia being noted as an intervention, this is a reference to the information in the column in Mr Paranthoienne's Pain Management Charts headed, 'Interventions Provided &/or Medications Administered'.

Analgesia administration on 20 September 2017

14. In paragraph 98.6 of my First Statement I indicate that on 20 September 2017 at 1940hrs, 'PRN Endone was given together with other regular analgesia as prescribed'.
15. Mr Paranthoienne's Nursing Progress Notes from 20 September 2017 at 1940hrs indicate that 'Lyrica 25mg B.D. & PRN Endone 5mg q2hrly' was prescribed, as opposed to administered.
16. Paragraph 98.6 of my First Statement should read:
- 16.1. '20 September 2017 at 1940hrs: pain was assessed on 19 September 2019 which rated 8/10. Oxycontin 20 mg administered as available.'
17. The nursing note written on 20 September 2017 at 1940h summarised what had occurred on 19 and 20 September 2017 in relation to pain assessment, medication and pain monitoring.

Wound care
